

3RD NEWSLETTER

SUSTAIN/ BIODIVERSITY EDUCATION FOR
SUSTAINABLE DEVELOPMENT

2ND TRANSNATIONAL MEETING IN GERMANY

The second Sustain project meeting took place in Vechta, Germany. The University of Vechta hosted all partners on March 8th and 9th, 2023.

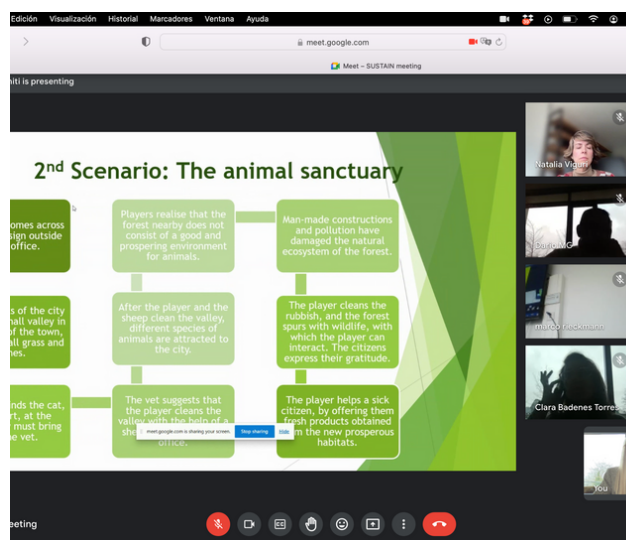

During this gathering, the partners had the opportunity to plan the elaboration of the Minecraft challenges and discuss what the lesson plans for the teachers would need to include.

They also analyzed the overall strategy of the project and revised the next steps and timeline.

WHAT WILL THIS MINECRAFT GAME DO?

- It will provide a complete instructional package, that will allow teachers to center their efforts around out tool that educates about the dangers of biodiversity loss.
- It will actively engage students aged 9-12 in environmental issues.
- It will add an innovative and digitalized tool in mainstream education.

WHAT'S COMING...

Minecraft Training Session to Boost Your Teaching Skills!

If you are a teacher, this is for you!

Why should participate?

- **To Enhance Your Skills:** This training offers you the chance to acquire new skills and techniques in English, all while exploring the boundless possibilities of Minecraft as an educational tool.
- **To Engage at a European Level:** Join a diverse community of like-minded educators from the Netherlands, Germany, Spain and Greece. Share ideas, collaborate, and foster connections that transcend borders.
- **It is Free of Charge:** This training session comes to you completely free of charge, making it an unmissable chance to further your professional growth.
